PRESS KIT NEPSU

The Triangle, the most versatile speaker

The Triangle is a wireless Wi-Fi and Bluetooth speaker with an interchangeable aluminum front plate and acoustic fabric, which can be customizable to your likings. It can thus integrate seamlessly and unobtrusively in any decor and any environment.

3 fun steps for your Triangle

Simply Choose

the color of your aluminum plate to customize it to your desire.

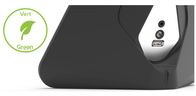
if you want the cloth and the power cable to be black or white to fit your needs.

the position to place the Triangle; on a wall, in a room's corner or on a surface.

We are proud to say the Triangle is

Made in Canada

The Triangle is officially a Made in Canada product as the majority of production expenses remains within the country and the product assembly process is done in Toronto. Among theses expenses are included the printed circuit board assembly, the injection molding of parts and the machining of aluminum parts.



Green

Made of the new sustainable award-winning Finnish material, the UPM forms, the Triangle will not only environmentally friendly, but will also be acoustically optimized and have a smooth and premium feel. This natural fibre composite, 50% wood 50% plastic, is recyclable and has a lower carbon footprint than other plastic materials. That's our first step to contribute to the environment.

Specifications

- Wi-Fi
- Bluetooth
- Jack 3.5
- NFC
- AptX
- IOS-Android
- Microphone
- Multiroom
- Internet radios

Discover the design

The shape

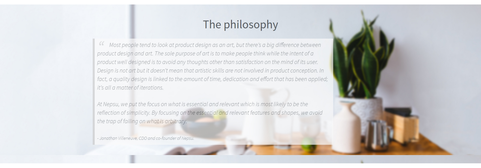
Our design's philosophy, not only gave the Triangle its unique shape as a result, but also optimized its efficiency when placed in the corner of a room, an often unused space. In addition to freeing up space, the Triangle, when installed in a room's corner, benefits of a natural sound amplification effect from the wall junction to produce a clearer and room-filling sound.

The philosophy

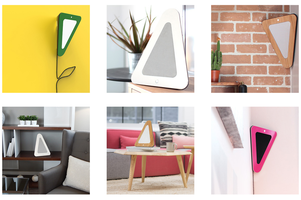
" Most people tend to look at product design as an art, but there's a big difference between product design and art. The sole purpose of art is to make people think while the intent of a product well designed is to avoid any thoughts other than satisfaction on the mind of its user. Design is not art but it doesn't mean that artistic skills are not involved in product conception. In fact, a quality design is linked to the amount of time, dedication and effort that has been applied. It's all a matter of iterations.

At Nepsu, we put the focus on what is essential and relevant which is most likely to be the reflection of simplicity. By focusing on a few, well relevant features and shapes, we avoid the trap of falling on what is unnecessary. "

- Jonathan Villeneuve, COO and co-founder of Nepsu



Integrations



Behind the product

We want to

- Initiate a movement of responsible consumption for electronic products.
- Inspire change in the way people use and create products for greater personal experience and development.
- Improve people's life and to inspire personal development and well-being.

The Team

At Nepsu, we're more than just a group of genius in the same room working on new products. We are creative, we are determined and we like to do things differently by challenging the industry's traditions for greater products.

Julien Tupula
CEO

julien.tupula@nepsu.com

Nominated for his considerable experience and interest in team coordination, Julien Tupula is the President and CEO of Nepsu. Graduate from École Polytechnique de Montreal in Aerospace Engineering, Julien began his career by managing several projects at Bombardier and Airbus. By dealing with different clients, she presents an understanding of the upcoming trendy world of design. As graphic designer at Nepsu, Ms. Nguyen strives to innovate a new image for this startup.

Nepsu has been part of

Frequently Asked Questions

What are the next products that Nepsu could offer?

Nepsu will develop other audio products in the coming years. We will also develop other products that aim to create a personalized atmosphere. Lighting solutions will be considered.

Where can you ship the product?

For now, we're only planning on shipping in North America because of the costs of certifications in other continents. If there's enough demand, we will obtain those certifications.

How easy is it to change the aluminium plate?

Simply place one hand on the top of the speaker and make a gripping movement by folding your four fingers to separate the front from the rest of the speaker, the magnetic force will be noticeable during the operation. Remove the front and put the alternative front approaching it from the speaker, the magnetic force will do the rest.

Is there an internal battery in the Triangle?

An add-on battery pack is something we are currently working on.

How many speaker do I need to use the Multi-room feature?

In order to use the Multi-room feature, a minimum of two Triangle speakers are required, allow. ing you to control two distinct zones. Each zone has its own audio source. In order to use the Multi-room feature at its maximum potential, a single zone can be controlled with up to 10 Triangle speakers or 3 zones with up to 5 speakers each.
